There are no material departures from prescribed accounting standards in the adoption of these standards. Global Business Environment

The world economy, following the turmoil of the last few years, displayed some initial signs of strength according to recently reported indicators. As could be expected, the initial upturn has largely been felt in the core sectors. This has contributed to expectations of stronger GDP growth in several regions / countries globally. In the IT sector, growth in demand from key consumption segments has created a limited turnaround but this trend is yet to gain significant strength. Moreover, demand growth has been focused on maintaining and expanding the returns on existing IT investments rather than committing fresh investments.

The Indian Opportunity...

Here lies the opportunity for Indian companies that have the business experience, domain strengths, technology capabilities, management bandwidth, technical talent and above all the focused commitment to nurture and establish global brand name for itself.

According to NASSCOM, FY2012 is a landmark year – while the Indian IT-BPO industry weathered uncertainties in the global business environment, this was also the year when the industry set to reach a significant milestone – aggregate revenue for FY2012 crossed USD 100 billion. Aggregate IT software and services revenue (excluding hardware) was estimated at USD 88 billion.

An eco-system of partners and alliances is being set up to address this opportunity.
