MANAGEMENT DISCUSSION AND ANALYSIS REPORT

(i) Industry structure and developments:

Overview

The financial statements have been prepared in compliance with the requirements of the Companies Act, 1956 and Generally Accepted Accounting Principles (GAAP) in India. There are no material departures from prescribed accounting standards in the adoption of these standards. The management of Starcom Information Technology Limited accepts responsibility for the integrity and objectivity of these financial statements, as well as for various estimates and judgments used therein. These estimates and the judgments relating to the financial statements have been made on a prudent and reasonable basis, in order that the financial statements reflect in a true and fair manner, the form and substance of transactions and the state of affairs and profits for the year.

Global Business Environment

The world economy, following the turmoil of the last few years, displayed some initial signs of strength according to recently reported indicators. As could be expected, the initial upturn has largely been felt in the core sectors. This has contributed to expectations of stronger GDP growth in several regions / countries globally. In the IT sector, growth in demand from key consumption segments has created a limited turnaround but this trend is yet to gain significant strength. Moreover, demand growth has been focused on maintaining and expanding the returns on existing IT investments rather than committing fresh investments.

The India Opportunity...

Here lies the opportunity for Indian companies that have the business experience, domain strengths, technology capabilities, management bandwidth, technical talent and above all the focused commitment to nurture and establish global brand name for itself.

According to NASSCOM, FY2012 was a landmark year – while the Indian IT-BPO industry weathered uncertainties in the global business environment, this was also the year when the industry set to reach a significant milestone – aggregate revenue for FY2012 crossed USD 100 billion. Aggregate IT software and services revenue (excluding hardware) was estimated at USD 88 billion.

Starcom Information Technology: Poised For Growth

During the financial year 2013-2014, Starcom Information Technology Limited (SITL) successfully made several operating initiatives with the underlying objective of creating a successful global business. Powered by a strong business strategy and an aggressive management team, SITL has created a robust pipeline to support sustained business expansion and value enhancement in the coming years in the areas of business intelligence, enterprise analytics and engineering services. In the year 2013-2014, the Company is progressing in the said areas and achieving new heights.

(ii) Opportunities and Threats:

Opportunities:

Recovery and growth of economy as well as significant technology changes are presenting several opportunities to Starcom Information Technology Limited.

- a) Gartner predicts that up to 20% of Companies will own no IT assets of their own recognizing the potential of this trend, Starcom Information Technology Limited is developing competency as well as alliances in this technology and services area.
- b) Enhanced awareness and concern for global warming is leading all enterprises to look for ways to reduce their carbon footprint without compromise on business growth and potential. Starcom Information Technology Limited is readying itself with services in the area of Green IT as well as IT for green. An eco-system of partners and alliances is being set up to address this opportunity.
- c) Improving fortunes of IT industry is increasing the demand for IT professionals and large scale recruitment.

Threats:

As Indian economy continues to outpace developed economies in the world, India continues to be an attractive market for major IT players. This enhanced focus on India continues to exert competitive pressure on Starcom Information Technology Limited performance in domestic market.

The growth in the economy and IT industry is expected to lead to increase in attrition next year. This pressure on attrition as well as fast changing technology landscape will necessitate increased investment in its people and innovative approaches to retain and develop right talent.

(iii) Segment-wise Performance:
